Claire Andreasen, DVM, PhD
2012 ACVP President

In the last newsletter, the 2012–2017 ACVP Strategic Plan was introduced. That document offers a roadmap of key issues to address during the next 5 years to remain a progressive and forward-looking organization that serves the needs of its members, especially during times of substantial change. The following is the ACVP 2012-2017 Strategic Plan Overview.

Implementation Plan
• Actions are to be accomplished over the next 5 years, 2012–2017.
• Committees and task forces can determine prioritization, method of implementation, and resources needed.
• Each committee and task force, and its Council liaison, will report progress to Council.

Strategic Goal 1: Uphold the high standards of veterinary pathology by advancing ACVP certification as the premier credential in the field of veterinary pathology.

Actions:
1. Create organizational structure and create Examination Board.
2. Conduct a cut-score analysis.
3. Revise examination format using new technologies and accreditation standards.
4. Develop SOPs for role delineation-based mapping of examination questions.
5. Modernize the examination question databases.
6. Update Examination Committee SOP and proctor recruitment SOP.

continued on page 2

continued on page 3
From the President - continued from page 1

7. Implement a phased, 2-part certifying examination.
8. Improve the website for the certifying examination process.

Success Indicators:
• Certification examination and process more compatible with NCCA accreditation standards
• Streamlined and more efficient preparation of the certifying examination
• Wider pool of proctors for the Examination Committee
• Initiation of a 2-part certifying examination
• Updated credentialing process that allows sponsors to acknowledge candidates’ competency in non-testable areas of pathology

Strategic Goal 2: Support and create opportunities for life-long learning.

Actions:
1. Use Annual Meeting and other educational programs to foster life-long learning.
2. Use Veterinary Pathology to foster life-long learning.
3. Use ACVP website and new technologies to foster life-long learning.
4. Develop new educational tools to foster life-long learning.
5. Develop Maintenance of Certification (MOC) plan, including guidelines for documentation.

Success Indicators:
• Increased awareness and engagement of members in ACVP-sponsored life-long learning
• Creation of a feasible system that documents member life-long learning
• Creation of an MOC program that is acceptable to members and the ABVS
• Greater attendance at the ACVP/ASVCP Annual Meeting and/or meeting workshops by ACVP members
• Establishment of interactive on-line learning tools in conjunction with Veterinary Pathology
• Development of workshops or on-line teaching materials for ACVP members by C.L. Davis Foundation, or other societies or groups

Strategic Goal 3: To promote a uniformly high-level of training on the broad range of veterinary pathology competencies, including those that are tested and those that are non-testable.

Actions:
1. Identify better ways to use the ACVP/ASVCP annual meeting, Veterinary Pathology, website, and other resources to enhance training opportunities.
2. Promote a Training Program Communication Network to enhance inter-program communication and resources.
3. Clarify trainer responsibilities to verify competence and examination eligibility of their trainees.
4. Refine guidelines for attributes not currently tested on the certifying examination (see Strategic Goal 1).
5. Develop recommendations for recruitment of high quality trainees.
6. Identify resources for professional development for trainers and mentors.

Success Indicators:
• Documented and applied method for assessing skills needed by veterinary pathologists that are not assessed by the certifying examination
• Increased involvement of trainers in assuring trainee preparedness for the certifying examination
• Increased sharing of resources between training programs
• Completion of a supply/demand survey
• Applications for training programs remain highly competitive
• The ACVP examination maintains high standards and has a high pass rate
• Online activity for reviewing training materials increases
• Online training material content increases
• Previously “non-testable” attributes become testable
• Existence and utilization of externships for trainees increase in all practice areas
• Increased opportunities for trainees to obtain bench research and diagnostic assay application experience
• Evidence that collaborations, policies, and resource development to assist candidate readiness are improving

Strategic Goal 4: Foster domestic and international strategic partnerships.

Actions:
1. Establish relationships with other organizations to promote high quality education in veterinary pathology.
2. Create guidelines to establish relationships with pathology organizations in other countries using corps of member ambassadors.
3. Create more efficient mechanisms for interaction and communication with key pathology partners, such as ASVCP, STP, ASIP, others.
4. Explore international alliances and survey international societies to identify areas of mutual interest.
5. Network with other AVMA Recognized Veterinary Specialty Organizations to identify common issues.
6. Establish an annual meeting rotation between International Colleges/Societies to be held during ACVP, ECVP, or other annual meetings.

Success Indicators:
• More formal interaction with the C.L. Davis Foundation to promote global pathology education
• Creation of focused groups of members who serve as international ambassadors to other veterinary pathology organizations
• Increased communication with our key partners
• Expansion of the global outreach of Veterinary Pathology
From the President - continued from page 2

• Ongoing annual discussion between international Colleges and Societies of veterinary pathology
• Increased attendance at annual meetings by members of partner organizations
• Increased communications with other AVMA Recognized Veterinary Specialty Organizations

Strategic Goal 5: Enhance communications to engage membership and to improve visibility and impact of the College and veterinary pathology within the veterinary profession, scientific community, and the public.

Actions:
1. Create mechanisms for increased member involvement.
2. Facilitate SOPs for recruitment, chair succession, and member rotation for all standing committees.
3. Explore international alliances for Veterinary Pathology.
4. Use the annual meeting, other educational programs to foster communications, visibility, and member relations.
5. Use Veterinary Pathology to foster communications, visibility, and member relations.
6. Use website, new technologies to foster communications, visibility, and member relations.
7. Enhance the scientific mission and impact factor of Veterinary Pathology.
8. Enhance the teaching and diagnostic missions of Veterinary Pathology.
9. Conduct workforce analysis to update employer needs and employment opportunities.

Success Indicators:
• Sponsoring specific events to increase member involvement.
• Greater involvement of members of the College in activities of the College
• Increased requests by members for placement on committees or task forces
• Increased subscriptions
• Increased impact factor
• Media metrics (media hits, website traffic, # of articles)

The Secretary/Treasurer’s Corner - continued from page 1

Upcoming Annual Meeting in Seattle
The 2012 ACVP and ASVCP Concurrent Annual Meetings will be held at the Washington State Convention Center in Seattle, Washington from December 1-5. The preliminary program is filled with something for every pathologist and can be found at: http://www.acvp.org/meeting/2012/prelimprogram.cfm. Online registration will be open soon, but the registration information can be found at: http://www.acvp.org/meeting/2012/registration.cfm. Seattle is a vibrant city and this will be the first time that the ACVP has held its meeting there. Information on Seattle can be found at: http://visitseattle.org/portals/ACVP/welcome.aspx. We look forward to seeing you there!
ACVP Member Spotlight

Forensics Veterinary Pathologist Shares Insights as She Seeks Answers to Crimes Against Animals

Barbara Hernandez, APR for ACVP

Tabitha Viner, DVM, Diplomate, ACVP, Supervisory Veterinary Pathologist for the U.S. Fish and Wildlife Service Forensics Laboratory, has always wanted to help animals and hoped to discover a way to be useful in the world. And every day she does everything she wanted to do—and more—for the hundreds of cases that go through her forensics laboratory in Oregon.

Dr. Viner is not doing it alone. She works with more than 35 people in the laboratory and scores of field agents around the world (whom she calls the unsung heroes), uncovering the mysteries of crimes against animals. As animals have an increasing importance in the eyes of the law, there has been a greater need for experts like Dr. Viner and her colleagues.

In fact, Dr. Viner is part of the ONLY forensics team in the world that can handle crimes involving thousands of rare and endangered species. A recent story estimated the lab is responsible for protecting more than 34,000 species. But according to Dr. Viner, the lab is more than pathology; it’s also recognizing art or objects made from protected animals, using fingerprints, ballistics, and genetic and chemical analysis of bile and other materials.

Her previous experience at the Smithsonian’s National Zoo in Washington, DC certainly paved the way for her work at the forensics lab, reminding her to always pay close attention to detail and keep an open mind. “It’s critical that you don’t overlook anything that might point you in a direction you never imagined.”

Dr. Viner reports the lab typically receives between 150 and 200 cases each year from around the world. Occasionally they are asked to testify in cases where a federal crime has been committed and prosecuted.

“Diagnostics has never been more important—for humans or animals.” She continues. “There’s so much we don’t know. We should be applying what we do know from human forensics. We can and should work together to progress both fields.”

For veterinary students interested in seeking additional growth opportunities in pathology, this career path may be small now, but it’s growing, according to Dr. Viner. “As animals gain a voice in our world, and laws are enacted to protect their rights, veterinary pathologists have a special role to answer the tough questions and get to the heart of crimes committed against all species.”

Dr. Viner suggests that individuals who have a propensity for attention to detail might be well-suited for this specialty. As they pursue their education, she suggests that they start learning more about the state and federal laws protecting animals. Some schools that have great programs include:

- University of Florida (http://forensics.med.ufl.edu/)
- West Virginia University (http://continuinged.wvu.edu/courses/list.php?cid=1)
- University of Central Oklahoma (http://www.uco.edu/forensics/)

“We have an internship program here for DVMs who want to learn forensic techniques,” says Dr. Viner. “There are also other learning opportunities out there. We’re small in numbers, but happy to help students be successful.”
ACVP Scholarship Externship Reports

Jennie Jankovsky
University of Tennessee

My experience at UGA was both educational and enjoyable. Activities included daily necropsy (including gross evaluation, tissue trimming, histopathology, and generation of a final report), daily biopsy (including tissue trimming, histopathology, and a final report), resident rounds (ophthalmology, gross, and histopathology), and resident classes (hematology and cytology). I also created two PowerPoint files for use in teaching senior students. The opportunity to meet and befriend new people and to observe how another institution operates was appreciated. I have a better idea of opportunities for residency and what residents’ duties encompass. The chance to investigate a possible choice for residency was invaluable. Thank you for the scholarship that helped fund this experience!

Dillon Muth
The Ohio State University, College of Veterinary Medicine

During my two-week visit to the UC Davis campus, I had the pleasure of participating in a rotation with the Department of Pathology. Primarily, I took part in the daily necropsies and subsequent report writing, but I was also able to attend many seminars and the weekly histopathology conferences. It was a privilege to interact with a multitude of pathologists, whether on the floor, in the demonstration lab, or in the classroom, and I am very appreciative of the opportunity.

Having had some time to reflect on my senior year rotations, I am glad that I was able to make the trek to California from Ohio and learn from other world-renowned veterinary pathologists. It was important to receive education from a different perspective than to which I was familiar; it definitely encouraged critical thinking, undoubtedly helped to shape my pathology instincts, and further nurtured my interest in pathology.

As I look forward to the upcoming first year of my residency at Johns Hopkins, I know that were it not for experiences such as the one at Davis, I would not feel nearly as prepared for the trials and tribulations of a residency. Surely, although there will be rough patches, simply having had more exposure to pathology at other institutions than my own will make it easier to learn and improve upon my skills as I move forward.

I am indebted to the ACVP for providing me the opportunity to travel to UC Davis during my senior year of veterinary school, and as I progress through my residency with the end goal of becoming a veterinary pathologist/research scientist, I look forward to becoming more and more involved with ACVP.

Jenny Pope
University of Tennessee

During my externship at Auburn, I spent time with pathologists from the University and diagnostic lab. Some of the interesting necropsy cases I saw included a dog with hypoadrenocorticism and chronic liver failure, a cow with an extreme case of liver flukes, a horse with a splenic capsular tear, and a sow with a splenic torsion. I learned what samples to take for Chronic Wasting Disease of deer and was able to practice sampling. I also was able to see what a positive result for CWD looks like.

I was able to examine histology slides from necropsy cases and go over them with my mentor. I also spent time looking at surgical pathology slides with the pathologist on duty. I attended gross rounds and clinical pathology rounds. I presented three cases for gross rounds. I participated in the weekly slide conference and described unknown slides. In addition, I attended case presentations by students at the college. I was able to sit in on the graduate class, Mechanisms of Disease, which is a class that the combined residency/PhD students can take. I was also fortunate to attend a presentation on the histopathology portion of the board exam and how best to prepare for it. Finally, I spent some time investigating stains and image analysis software as a possibility for quantifying nuclear pleomorphism in tumors.

During my externship at the University of Wisconsin, I spent every afternoon with the current fourth years on necropsy duty. I was the lead dissector and completed the necropsy report for an alpaca, a horse, and a cow. I was also responsible for writing and presenting the report at rounds. The alpaca had chronic diarrhea and anemia. Overall gross findings indicated a possible Eimeria infection. The cow had severe hepatic lipidosis, icterus, and fat necrosis associated with ketosis. The horse had recurrent bouts of colic due to a ganglioneuroma of the cranial mesenteric ganglion. I helped trim biopsy samples, as well as spending time reading biopsies with both the resident and the pathologist on duty.

I attended biopsy rounds, in which interesting cases from the week were presented for second opinions or just to share. I attended clinical pathology rounds to learn more about cytology. I attended dermatopathology rounds that are done in coordination with the Wisconsin State diagnostic lab. I also attended a gross image review that was conducted by a pathologist from Covance in a matter similar to that portion on the board exam. Finally, I attended AFIP rounds, in which the residents are given unknown slides, present them, and then go over the submitter and AFIP comments.

Overall, these were valuable experiences to get a feel for the programs and case loads, as well as to see how different schools write necropsy reports, do biopsies, and what cases are seen in different regions. It was an excellent experience, and I thank ACVP for giving me the externship scholarship to help pay for expenses.
In 1996, Dr. Leon Saunders (1919-2009) published a “Biographical History of Veterinary Pathology” containing the contributions of veterinarians that established and expanded the discipline of veterinary pathology. The book is dedicated to Dr. William Osler (1849-1919), a Canadian physician, clinician and pathologist, who is considered the father of veterinary pathology in North America. The text provides brief biographical sketches on the personal and professional lives of 150-plus veterinary pathologists that form a truly international cast of characters.

If the foundation of veterinary pathology has been laid by those highlighted in Saunders’ text, then those who have come later, and even now, serve as the “pillars” that support the expansion of our discipline. With this theme in mind, the Education Committee of the ACVP has inaugurated a mini-symposium, titled, “Pillars of Pathology,” which highlights the newcomers in the history of veterinary pathology. Four pathologists were chosen to populate this first mini-symposium, bearing in mind that the candidate list was long and the choice of only four very difficult. Drs. Stephen W. Barthold, Donald J. Meuten, John M. King, and Mary Anna Thrall will speak at the inaugural “Pillars of Pathology” mini-symposium at the 2012 Annual Meeting of the ACVP/ASVCP in Seattle, WA. This is not intended to be an awards/recognition ceremony or any kind of career send-off as all are still active in their fields; however, the spirit of the session is educational and will discuss how ordinary people can become extraordinary pathologists.

The current plan of the Education Committee is to consider repeating this format every three to five years with different extraordinary pathologists. Of course, this plan depends upon how well this first effort is received by you, and that will undoubtedly be judged by your attendance. The inaugural “Pillars of Pathology” mini-symposium is scheduled for Sunday, December 2, 2012, 8:00 a.m. to 12:00 noon, at the Washington Trade and Convention Center. For a complete listing of this and other sessions, please consult the 2012 ACVP/ASVCP Preliminary Program that is available online at http://www.acvp.org/meeting/2012/prelimprogram.cfm. Additionally, please visit http://www.acvp.org/meeting/2012/pillars.cfm to read a full-length article on the participants in the “Pillars” mini-symposium.
The 7th Annual ACVP Very Important Pathologist (VIP) Program

Derek Mosier, DVM, PhD

The 7th Annual ACVP Very Important Pathologist (VIP) program provides a glimpse of unique and interesting aspects of Seattle beyond the walls of the Washington State Trade and Convention Center. Created for our emeritus members and members of 25 years or more, the VIP program offers an alternative to another day of darkened meeting rooms and PowerPoint slides.

We’ll start the day at the Seattle Aquarium for a private tour with the aquarium veterinarian. The aquarium is one of twelve Centers for Ocean Sciences Education Excellence and ranks as the 9th largest aquarium in the United States based on attendance. The aquarium is organized around six major exhibits: Window on Washington Waters, Life on the Edge, Pacific Coral Reef, Puget Sound Fish and Dome Room, Puget Sound Orcas Family Activity Center, and Marine Mammals. Walk through the Ring of Life and be surrounded by moon jellies, one of the world’s oldest living creatures. View the diverse creatures of the 25,000 gallon Pacific reef tank, a reminder of the critical role of coral reefs, which provide a home for over 25% of marine species. Beyond the exhibits, Seattle Aquarium biologists conduct research on various Puget Sound species, including the giant Pacific octopus, sixgill sharks, and northern sea otters in an effort to understand and contribute to the health of the Puget Sound marine environment.

After one last look at the amazing 100-year-old, 400-pound giant clams at the aquarium, we’ll depart for Ivar’s Acres of Clams. Ivar’s restaurant has been a Seattle tradition since 1938. Located on the waterfront at Pier 54, we’ll be able to enjoy the views of Puget Sound.

The afternoon will bring the opportunity to experience the cultural and artistic environment of Seattle with a visit to the Chihuly Garden and Glass exhibition at the Seattle Center. The exhibition is the inspiration of Dale Chihuly, who’s over 40-year career has pushed the boundaries of glass as an art medium. His works are included in more than 200 museum collections worldwide, and he has created more than a dozen well-known and highly regarded series of works. The exhibition is comprised of an Exhibition Hall, a Glasshouse, and Garden. The Exhibition Hall provides a comprehensive look at Chihuly’s work within eight galleries and three Drawing Walls. The Glasshouse is the centerpiece of the exhibition, consisting of an airy, 40-foot tall, glass and steel enclosure that surrounds an expansive, suspended, 1,400 piece, 100-foot-long artwork. The Garden is a rich assortment of trees, plants, and flowers anchored by four monumental glass sculptures. Chihuly has often said, “I want my work to appear as though it came from nature so if someone found it… they might think it belonged there.” A visit to the Chihuly exhibition will shake up your right brain and change the way you look at glass, light and nature.

Consider joining us for a day without posters and platform presentations. A day at the aquarium, Ivar’s, and Chihuly’s exhibition will be a day you won’t forget.

### Dr. Timothy Boosinger Selected as Provost & Vice President of Academic Affairs at Auburn University

Following a national search, Auburn University President Jay Gogue has selected Timothy Boosinger as Provost and Vice President for Academic Affairs. This appointment was approved by the Auburn Board of Trustees at its June 22 meeting.

Dr. Boosinger, who has served as Interim Provost at Auburn since June 2011, will continue to oversee the academic programming for twelve colleges, and is responsible for fostering the advancement of the University strategic plan. He has an extensive background in teaching, research, and administration, serving as Dean of the Auburn College of Veterinary Medicine from 1995-2011.

“Dr. Boosinger has done an excellent job as Interim Provost for the past year and we look forward to his continued leadership as Provost and Vice President of Academic Affairs,” Auburn President Jay Gogue said. “Our administration and faculty have enjoyed working with him to strengthen Auburn’s academic programs. His experience as an Auburn Dean for 16 years gives him special insight into the needs of our 12 colleges and schools. Most of all, I believe our students will benefit as he helps shape the future of Auburn University.”

Boosinger earned a Doctor of Veterinary Medicine degree in 1976 and a PhD in pathology in 1983, both from Purdue University. He received the Distinguished Alumnus Award from the Purdue School of Veterinary Medicine in 2004.

Prior to being appointed Dean of the College of Veterinary Medicine, Boosinger served as the Associate Dean for Academic Affairs from 1993–1995, having joined the Auburn University faculty in 1983. He has served multiple terms as a University Senator and has chaired search committees for university leadership positions.

“I am honored to have been asked to serve as Provost and look forward to working with students and faculty as we address current and future challenges,” Boosinger said. “As a land-grant university, we have a continuing commitment to the improvement of the quality of life in our state and nation, and I am pleased to be a part of that mission as Auburn’s Provost.”

National leadership positions include six years of experience on the American Veterinary Medical Association’s Council on Education that accredits all colleges of veterinary medicine in the United States and Canada, plus four schools in the United Kingdom, three in Australia, and one in New Zealand.

From 2006–2009, Boosinger served as an officer for the Association of American Veterinary Medical Colleges, and was President in 2007-2008.

(SOURCE: Auburn University)

### ACVP Diplomate Dr. Heather L. Wamsley wins Student AVMA Teaching Excellence Award

The AVMA honored some of the nation's top veterinarians during an awards ceremony at the 2012 Annual Convention in San Diego, California. Each recipient has worked tirelessly to improve the lives of both animals and people around the country and the globe. These individuals represent the very best in all areas of veterinary medicine, from education and public service, to research and private practice.

Heather L. Wamsley, DVM, PhD, Diplomate, ACVP (Clinical), an alumna of University of Wisconsin-Madison, received the American Veterinary Medical Association (AVMA) 2012 Student AVMA Teaching Excellence Award. This award is a student-nominated award presented to a professor who educates, inspires, and strongly impacts the students whom they teach.

Dr. Wamsley is an assistant professor and the clinical pathology residency coordinator at the University of Florida, College of Veterinary Medicine. She obtained a bachelor's degree with honors in bacteriology and a DVM with honors, both from the University of Wisconsin-Madison, and a PhD in molecular biology of infectious diseases from the University of Florida. Dr. Wamsley also completed a total of four years of specialty clinical training, including one year as a small animal medical and surgical intern at the Animal Medical Center in New York City, and three years as a resident at the University of Florida, after which she was certified as a Diplomate of the American College of Veterinary Pathologists, clinical pathology specialty.

Since 2004, Dr. Wamsley has been active in international continuing education at several annual conferences and via online distance education. She also performs outreach through volunteerism for the University of Florida, College of Veterinary Medicine's public radio show, Animal Airwaves–Live, for local public schools as a judge for numerous science fairs, and as a classroom speaker for elementary and middle school students.

Four classes of DVM students have selected Dr. Wamsley as Class Teacher of the Year since she became a faculty member in 2009. She was also chosen Support Services Resident of the Year by two classes of DVM students and has been recognized for scholarly activities in veterinary pathology and research. Dr. Wamsley received three University of Florida, College of Veterinary Medicine college-wide teaching awards in 2011: SCAVMA Clinical Sciences Teacher of the Year, College Teacher of the Year, and Pfizer Distinguished Teacher of the Year.

(SOURCE: American Veterinary Medical Association)
Bernard McSherry, DVM

A memorial celebration was held August 7 for renowned veterinary pathologist and Guelph professor Bernard McSherry. Dr. McSherry died Thursday, July 12, 2012, at a Guelph hospice at age 94, the University of Guelph's Ontario Veterinary College reported Tuesday.

Born in Winnipeg and raised in Toronto, Dr. McSherry studied at OVC before enlisting in Canada's armed forces during the Second World War, fighting in the Allied landing at Normandy on D-Day in 1944. He returned to OVC in 1948 and worked his entire career there.

Early in his career at the college, McSherry worked on chemical abnormalities in animals, including acid-base and chemical imbalances in such elements as potassium and sodium through severe fluid loss caused by diarrhea in cattle. He developed an intravenous solution to treat these imbalances in young livestock suffering from dehydration due to post-natal diarrhea. The use of balanced electrolytes in animal and human patients would be known at various schools in North America for years afterward as "McSherry's Solution," OVC said.

Dr. McSherry also studied hematology, especially hematopoiesis, researched the serum protein fibrinogen, and used serum electrophoresis as a routine analytical tool. He would co-write papers on blood cell kinetics, lead toxicity, lymphatic cancer, coagulation, and bovine ketosis.

Guelph's OVC became a center of veterinary clinical pathology during Dr. McSherry's tenure. "He started Guelph's research and teaching program in pathology, … working at first with one lone technician," the university said.

Dr. McSherry, who retired from OVC in 1986, earned a Lifetime Achievement Award from the American Society for Veterinary Clinical Pathology in 2005 and an honorary membership in the American College of Veterinary Pathologists in 1976.

James C. Woodard, DVM, PhD

Dr. James Carroll Woodard, a member of the American College of Veterinary Pathologists, died May 2. Dr. Woodard was the first Chair of the University of Florida, Medical School's Division of Human Pathology, the first chair of the Veterinary Department, and started the Veterinary Pathology Department at the University of Florida. He was known nationally and internationally as an authority in bone pathology, and worked closely with Dr. Wayne Riser, who was a charter member of the ACVP. Dr. Woodard received degrees from both Auburn and the Massachusetts Institute of Technology.

2012 ACVP and ASVCP Concurrent Annual Meetings – Hotel Accommodations

Location: Sheraton Seattle, Seattle, Washington
Deadline for Hotel Reservations: November 2, 2012
Sleeping Room Rates: $207 single or double (not including a 15.6% tax)
Telephone Number for Hotel Reservations: +1-888-627-7056
(Be sure to tell the reservations agent you are with the ACVP/ASVCP Meeting.)

An online reservation link will be available on the ACVP website soon (www.acvp.org).
All meeting activities will take place at the Washington State Convention Center which is located one block from the Sheraton Seattle Hotel. There is no direct connection, so you will be walking outside to gain access to the Center.

Secure your hotel reservations soon for the 2012 Annual Meeting, scheduled for December 1-5!
ACVP SILENT AUCTION

Popular Items to Donate
All contributions are welcome, including products that interest your fellow colleagues professionally, as well as personally. Items should have a minimum value of $50 USD. Some popular items are:

- Vacation Getaways
- Books
- Electronics
- Themed Gift Baskets
- Autographed Sports Items
- Spa Treatments
- Jewelry
- Tickets to Social, Cultural or Athletic Events
- Hotel and Time-Share Stays
- Professional Equipment and Services
- Original Artwork
- Gift Certificates to National Restaurants or Stores

Exclusive and unique items are always a favorite!

ACVP 2012 Silent Auction

The ACVP is proud to present a Silent Auction at the 2012 Annual Meeting! Located in the Exhibit Area, the Silent Auction will support externship scholarships for veterinary students exploring veterinary pathology as a career.

The ACVP needs your donations to help make the Silent Auction a success! Donating to the Auction is a great way to support the veterinary pathology profession, and have fun at the Annual Meeting. Items from both members and companies are welcome.

PLUS, both item donors and winning bidders will have their names entered into a drawing for a free registration to the 2013 Annual Meeting in Montreal, Canada!

Recognition
For your donation, you will receive:
★ Acknowledgement on the auction bid sheets
★ Listing of your donation and name on the ACVP website
★ Listing in the Silent Auction Flyer, distributed to every attendee (if confirmed by print date)

To Make a Donation
Please complete the Silent Auction Donation form and fax or mail it to the ACVP Executive Office.

Getting Your Item to the Auction
Please send your items to the ACVP Executive Office as soon as possible (no later than November 1), along with a copy of the donation form on the back of this flyer. We will ship all items to the Annual Meeting.

For more information regarding the ACVP Annual Meeting or the Silent Auction, please call Brooke Miller at +1-608-443-2466, ext. 148, or contact her by email at bmiller@reesgroupinc.com.

Vacation Getaways
Books
Electronics
Themed Gift Baskets
Autographed Sports Items
Spa Treatments
Jewelry
Tickets to Social, Cultural or Athletic Events
Hotel and Time-Share Stays
Professional Equipment and Services

For more information on speaker affiliations, please visit the online preliminary program. + available at an additional fee  *Diplomate, ACVP
### 8:00 a.m.–12:00 noon

**Natural Disease Focused Scientific Session I**

**Session Chair:** Bradley Njaa, BSc, DVM, MVSc*

**Invited Speakers:**
- **Equine Herpesvirus Type 1 and its Virulence Factor Toolbox**
  - Klaus Osterrieder, PhD
- **Dysfunctional Immunity During Acute and Persistent Bovine Anaplasmosis**
  - Wendy Brown, PhD

9:30 a.m.–4:30 p.m.

**Exhibits Open**

**Poster Session and Veterinary Student Posters**

**Silent Auction**

12:00 noon–1:30 p.m.

**IDEXX/ASVCP Clinical Pathology Trainee Reception** *(by invitation only)*

12:15 p.m.–1:15 p.m.

**Emerging Disease Focus Seminar**

- **Discovery of an Oncogenic Gammaherpesvirus in Canine Lymphoma**
  - Nicola Mason, BVetMed, PhD, DACVIM

12:30 p.m.–4:30 p.m.

**ASVCP Veterinary Laboratory Professionals Session I**

**Session Chair:** Nicole Rosen, MT(ASCP)

1:30 p.m.–5:00 p.m.

**Natural Disease Focused Scientific Session II**

**Session Chair:** Bradley Njaa, BSc, DVM, MVSc*

**Invited Speakers:**
- **Dabblings in Dermatopathology**
  - Danny W. Scott, DVM, ACVD*
- **Feline Auditory System in Hearing and Deafness**
  - David K. Ryugo, PhD

4:30 p.m.–6:00 p.m.

**ASVCP Business Meeting**

5:00 p.m.–6:00 p.m.

**ACVP New Diplomates Reception**

6:00 p.m.–7:30 p.m.

**ACVP Town Hall Business Meeting**

7:30 p.m.–9:30 p.m.

**Mystery Slide Review and Neuropathology Case Presentations**

**Session Chair:** Jey Koehler, DVM*

ACVP Clinical Pathology Examination Slide Review
12:15 p.m.–1:15 p.m.
ACVP Gross and Microscopic Examination Slide Review
12:15 p.m.–1:30 p.m.
Latin Comparative Pathology Group Presents
1:30 p.m.
Free afternoon for exploring Seattle
1:45 p.m.–3:00 p.m.
Meet the Pathologists: A Discussion of Careers in Pathology
3:00 p.m.–5:00 p.m.
Veterinary Student and Resident Forum
5:15 p.m.–6:45 p.m.
ASVCP Reception
(open to ASVCP members)
6:00 p.m.–7:00 p.m.
ACVP Council and Corporate Partners Reception (by invitation only)
7:00 p.m.–9:00 p.m.
ASVCP Clinical Chemistry Review Session
Session Chair: Jeffrey McCartney, DVM*
7:00 p.m.–9:00 p.m.
Mystery Slide Seminar and Case Presentations: Liver Pathology
Session Chair: Melanie Breshears, DVM*

Tuesday, December 4

7:00 a.m.–8:00 a.m.
Committee Meetings

7:30 a.m.–5:00 p.m.
Registration Open
8:00 a.m.–10:00 a.m.
International Veterinary Pathology Coalition Breakfast
8:00 a.m.–12:00 noon
Concurrent Session I: Liver Pathology
Session Chair: John M. Cullen, VMD, PhD*
8:00 a.m.–8:10 a.m.
Introduction
8:10 a.m.–9:00 a.m.
Congenital and Acquired Disorders of the Biliary Tree
John M. Cullen, VMD, PhD*
9:00 a.m.–9:50 a.m.
New Prognostic Classification of Primary Hepatic Tumours in the Dog
Renee van Sprundel, DVM
9:50 a.m.–10:20 a.m.
Refreshment Break
10:20 a.m.–11:00 a.m.
Constructive Clinician and Pathologist Interactions in Hepatic Disease Diagnosis
Sharon Center, DVM
Sean McDonough, DVM, PhD*
11:00 a.m.–11:50 a.m.
Chemically-Induced Hepatic Proliferative Disorders in Rodents
David Malarkey, DVM, PhD*

Pathology Trainees Appreciation Luncheon
(Visit the ACVP website for more details)
10:45 a.m.–11:30 a.m.  
Immunity or Tissue Damage to Viral Infections: How Regulatory Cells and Factors Decide the Outcome  
Barry T. Rouse, BVSc, PhD, DSc

11:30 a.m.–12:00 noon  
Questions and Discussion

8:00 a.m.–1:20 noon  
Concurrent Session IV: Perspectives of Disease: Tales from the Crypt  
Session Chairs: Elizabeth Whitley, DVM, PhD*  
Brad N. Bolon, DVM, PhD, DABT, FATS, FIATP*

5:15 p.m.–6:30 p.m.  
ACVP Awards and Recognition Event

7:00 p.m.–9:30 p.m.  
ACVP Presidential Reception  
(all attendees are invited!)

Wednesday, December 5

8:00 a.m.–1:00 p.m.  
Registration Open

8:00 a.m.–1:00 p.m.  
ACVP Young Investigator Award Winner Poster Session

1:00 p.m.–4:00 p.m.  
Post-Meeting Workshop I +  
Immunohistochemistry in Canine and Feline Cancer Diagnosis and Prognosis  
Session Chair: Matti Kiiupel, DrMedVetHabil, PhD*

The workshop will offer an introduction to diagnostic immunohistochemistry, including the technical and logistic aspects of integrating immunohistochemistry into the regular surgical biopsy service. The main topic will be an overview of how immunohistochemistry can be utilized to increase our diagnostic capabilities and what antibody panels are most useful for aiding the diagnosis of various neoplastic entities in dogs and cats. The session will furthermore focus on the use of immunohistochemistry for the prognosis of some of the most common neoplasms in dogs and cats. In addition to immunohistochemistry, an overview of some of the most commonly used molecular diagnostic pathology tests for the diagnosis and prognosis of neoplastic diseases in dogs and cats will be given.

1:00 p.m.–9:00 p.m.  
Primate Pathology Post-Meeting Workshop II +  
Emerging Respiratory Viral Infections and Nonhuman Primate Case Presentations  
Session Chair: Vito G. Sasseville, DVM, PhD*

This workshop will focus on the molecular biology, pathology, animal models and therapeutic and vaccine approaches to prevention and control of emerging respiratory viral infections. There will be presentations of submitted nonhuman primate cases. The target audience is students, trainees, and experienced pathologists interested in respiratory viral infections and spontaneous diseases of nonhuman primates.

1:00 p.m.–1:30 p.m.  
Overview: Influenza, Respiratory Syncytial Virus and Metapneumovirus in Wild and Zoo-Housed Great Apes  
Karen A. Terio, DVM, PhD*

1:30 p.m.–2:15 p.m.  
Pathology and Pathogenesis of Influenza and Human Metapneumovirus in Non-Human Primates  
Thijs Kuiken, DVM, PhD*

2:15 p.m.–3:00 p.m.  
Emerging Respiratory Viral Infections and Nonhuman Primate Case Presentations.  
Guy Boivin, MD, MSC, FRCPC  
Vito G. Sasseville, DVM, PhD*

3:00 p.m.–3:15 p.m.  
Refreshment Break

3:15 p.m.–4:00 p.m.  
Molecular Signature of Host Immune Response to Influenza Infection  
Robert Palermo, PhD

4:00 p.m.–7:00 p.m.  
Case Presentations
Please complete all items on this registration form - type or print legibly. The deadline for pre-registration is November 16. After that date, plan to register at the meeting site.
Keep one copy of this completed form for your records. Save money by registering prior to November 2! All fees are quoted in U.S. funds.

Choose to register one of three ways:
1. If you wish to register via the Internet, please go to the ACVP website at http://www.acvp.org and follow the instructions for secure online registration. You will need a credit card to register through the Internet.
2. Fax your completed registration form with credit card information to +1-608-443-2474 or +1-608-443-2476 (we accept MasterCard, Visa, and American Express). Faxed registration forms without a form of payment will not be processed. If you are registering via the Internet or fax, do not mail the original registration form.
3. Mail your completed registration form and payment (in U.S. funds only, drawn on a U.S. bank) to the ACVP Executive Office (2424 American Lane, Madison, WI 53704 USA).

If you have not yet renewed your membership with ACVP or ASVCP, feel free to do so using this registration form (see the Membership Renewal Section on the back side of this form).

Additional Instructions:
a. Please complete one form per registrant.
b. Registration by telephone will not be accepted.
c. Payment must accompany each registration form. International registrants must submit payment in U.S. dollars, drawn on a U.S. bank.
d. The registration deadline for inclusion in the Attendee Directory (distributed onsite) is November 2.

Registration Confirmation
If you do not receive a confirmation e-mail within three weeks of registering, please call the ACVP Executive Office at +1-608-443-2466 to verify that your registration form has been received.

Cancellation Policy
Any Annual Meeting registration cancellations must be made in writing directly to ACVP. If received before November 16, the ACVP will apply a $50 administrative fee and refund the remainder of your registration fee following the meeting. After November 16, no refund will be given. Walk-ins and replacements are always welcome.

Registration Information (please print clearly)

Pre-Meeting Workshop Registration (workshops are available at a separate fee)
Choose the workshop you are interested in attending and include the appropriate payment:

**ASVCP Workshop**
- Members/Non-Members $275
- Resident/Trainees/Students $100

Promoting the Culture of Quality in Your Laboratory Setting
Saturday, December 1, 8:00 a.m.-5:00 p.m.

**C.L. Davis Foundation Workshop** $195
Birds Do It... Bees Do It... A Primer on Diagnostic Reproductive Pathology
Saturday, December 1, 8:00 a.m.-5:00 p.m.

**Pre-Meeting Workshop** $195
Mouse Modeling and Phenotyping: What You Need to Know to Survive in a Mutant World
Saturday, December 1, 8:00 a.m.-5:00 p.m.

Post-Meeting Workshop Registration (workshops are available at a separate fee)
Choose the workshop you are interested in attending and include the appropriate payment.

**Workshop I: Immunohistochemistry in Canine and Feline Cancer Diagnosis and Prognosis**
Wednesday, December 5: 1:00 p.m.-4:00 p.m.

**Workshop II: Primate Pathology**
Emerging Respiratory Viral Infections and Nonhuman Primate Case Presentations
Wednesday, December 5: 1:00 p.m.-4:00 p.m.

Select the appropriate workshop above and include the payment:
- Yes, Member $195
- No-Member $245
- Resident/Fellow/Graduate Student $100
- Professional Student** $50

**The number of student registrations available for the workshops is limited.**

Very Important Pathologist (VIP) Program
The VIP Program is available to members with 25+ years of certification and Emeritus members. The fee is $100 per person and includes lunch. If you are participating in the VIP Program, you must also register and pay the fee to attend the Annual Meeting. If you have questions, please contact Wendy Coe at wcoe@acvp.org or +1-608-443-2466, ext. 149.

Yes, please register me for the VIP program ($100 per person).
Tuesday, December 4 – 9:30 a.m.-4:00 p.m.
Number of people _________ X $100 per person = ________

If including a guest, please enter their full name: ______________________________

**Presidential Reception**
This year, the Presidential Reception will be held at the Sheraton Hotel on Tuesday, December 4, at 7:00 p.m. It will include an evening of networking and hors d’oeuvres. Each attendee and registered spouse/guest is entitled to one ticket to the Presidential Reception if they register in advance. Tickets for unregistered guests or friends are $60 each. Children under 10 years of age are free. Check the applicable boxes below.

Yes, I would like one ticket to the Presidential Reception.
I have a spouse/guest pre-registered at $65 (see page 1 under Spouse/Guest registration) and would like one ticket for that person.
Yes, I am interested in purchasing additional tickets:
Number of tickets _________ X $60 = ________

Contribute to the ACVP Funds
Your commitment is needed to build on the rich heritage of the College, enabling us to grow and prosper! Please indicate which funds you want to support and add the appropriate fee to your registration payment:
- ACVP Research and Education Endowment Fund
- General Scholarship Fund
- Greatest Need
Check one: $25 $50 $100 $ Other:__________

Continuing Education Credits
Register for continuing education credits by checking the applicable box below:
- Yes, I would like to receive American Association of Veterinary State Boards (RACE) continuing education credits.
- Yes, I would like to receive PACE continuing education credits for medical technologists.

ACVP Membership Renewal
Renew your membership in ACVP for 2013 by checking your membership fee below:
- Regular Member $250
- Emeritus with Journal $55
- Resident/Fellow/Graduate Student $100*

*Membership dues for residents, fellows, and graduate students must be accompanied by a letter of verification of their status from their department.

Please include the appropriate amount with your registration payment for the conference.
If you have specific questions, please contact the ACVP Office at +1-608-443-2466.

ASVCP Membership Renewal
Renew your membership in ASVCP for 2013 by checking your membership fee below:
- Regular Member (North America) $125
- Regular Member (Outside of North America) $135
- Student Member $60

Please include the appropriate amount with your registration payment for the conference.
If you have specific questions, please contact the ASVCP Office at +1-608-443-2479.

Payment
Please total your fees from the different categories included on this registration form.
